

# Green Coast Recycling, LLC

Green coast recycling is a locally owned and operated company. We are passionate about the environment and especially the issues affecting our community. We offer recycling to the areas outside of the city limits that have previously not had the service available. We do require minimum amounts of customers in areas or communities to make our routes efficient (environmentally and logistically). We prefer to deal with the home owner's association in any given community if possible. Our second approach is to build a minimum customer base.

We support and contribute to local environmental charities such as the Cape Fear chapter of the Surfrider Foundation and Cape Fear Riverwatch.

## Here's How it works

- The monthly cost is \$12.50. There is a one time fee of \$12 for set up and admin cost.
- You are provided up to 3 bins which are to be used for sorting of materials. Materials must be sorted in order to be picked up. We are exploring different options in the way that we collect and recycle your materials (sorted, unsorted etc.)
- If you are already living in a community where we are offering service, you may be added to that group by calling or emailing us at the below mentioned phone number and email. You can see our website to determine if your neighborhood is being serviced.

Last year the United States recycled enough to conserve the energy equivalent of 114 million barrels of oil. These measures reduce the need to use unrenewable and harmful substances.

The world's population has doubled since the 1960's and it is important that we reuse materials to decrease our negative impact on the planet. Be part of the solution not part of the problem. We look forward to having you as a client. Thank you.
